Top Products by Revenue

REVENUE INSIGHTS

- Seasonal Demand**
Revenue peaks during Q4, suggesting strong seasonal purchasing behavior. Inventory and marketing efforts should be increased before the holiday period.
- Product Concentration**
A small number of products generate a large share of total revenue. Protecting inventory availability for these products is critical to sustaining revenue.
- Customer Spending**
Customers maintain a relatively stable average order value, indicating opportunities for cross-selling and bundled promotions.
- Growth Strategy**
Revenue growth appears to be volume-driven rather than price-driven, emphasizing the importance of customer acquisition and retention.

Customer Churn Analysis

Segment Distribution

Recency vs Monetary

Top 10 At Risk Customers by Monetary Value

Business Insights

- Nearly **2,000 customers** fall into the "Others" category, indicating a large inactive customer base.
- **963 Champions** contribute the highest customer value and should be retained through loyalty programs.
- **502 At Risk customers** require targeted retention campaigns before churn.
- Customers with higher recency generally exhibit lower monetary value, suggesting purchasing frequency declines over time.
- Potential Loyalists (442) represent an opportunity for personalized promotions to move them into the Champions segment.

Country Analysis

Revenye By Country

Top Countries By Units Sold

Top 10 Countries with Maximum orders

Country Insights

- **United Kingdom** generates the highest revenue and sales volume, making it the primary revenue driver.
- Revenue is highly concentrated in a small number of countries, indicating **potential opportunities for international market expansion**.
- Several countries contribute steady order volumes but lower revenue, suggesting smaller average basket sizes.
- **Low-performing regions** could benefit from localized **marketing campaigns and product-specific promotions**.
- **Expanding best-selling UK products** into other high-performing markets may improve overall international revenue.
